When choosing a SwimLife Swimspa, the first thing to consider is the pump design, make sure the system you choose has enough power to deliver the results you want. Consider its use; are an every day athlete or a triathlete or getting a swimspa for family fun. Then look for a swim jet system that provides a smooth turbulence-free swim current and provides a flow rate that is able to produce a current you are comfortable to swimming in. If you need the ability to “alter” the resistance that allows the swimmer the ability to customize their swim to achieve the desired results you should consider the SwimExpert Swimspa models. Which ever Swimlife Swimspa you and your family choose it will become a way of life.
